Introduction To Balance

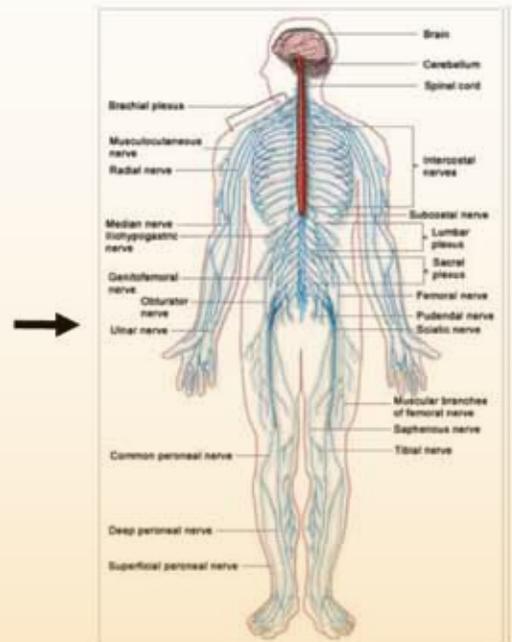

These three systems (vision, vestibular, proprioception) are required to ensure proper balance. Each sends a signal through the central nervous system, which the brain interrupts. The brain must then send the proper signal to the muscles causing contraction.

What controls your balance?

Peripheral System

Central Nervous System

Muscle Function; balance, stability and coordination

korebalance™ premiere and korebalance™

A trusted name in orthopedic
and neurosensory
rehabilitation.

The Korebalance™ Premiere and Korebalance™ are designed for use by medical centers and clinics, medical and PT offices, assisted living facilities, recreation centers, health and fitness clubs, universities and professional sport teams. The Korebalance™ System uses the latest in virtual and interactive technology, offering innovative high-tech balance assessment and training. Backed by over two decades of medical experience, the Korebalance™ systems will provide you and your patients with the best possible documented neurosensory assessment and training.

The software for the Korebalance™ and Korebalance™ Premiere provides balance and vestibular assessment. The units features patent pending variable stability technology. Training programs are incorporated, stimulating the brain and nervous system to improve balance, stability, coordination and posture. Interactive 3D games make training programs fun and captivating, increasing positive

korebalance™

korebalance™ premiere

How It Works:

Korebalance™ is the world's first balance training system incorporating VSR training together with cognitive interaction. Korebalance™ exercises visual, vestibular (inner ear) and proprioception (knowing where the body is in space) to find or create new pathways in the brain, improving balance. Korebalance™ is an essential component of any rehabilitation program. It delivers a higher quality of therapy by allowing healthcare professionals to customize the program and adjust difficulty levels and tasks over time.

“Pushing forward the idea of rehabilitation and fall prevention, if you have an awareness of your balance (or proprioception) and you train to keep it at its highest peak, like we do with flexibility, strength and endurance, we’re going to see a reduction in injuries. I think the Korebalance is a wonderful product. Balance equipment utilizing the unstable platform, such as the Korebalance™ machine, really is one of the greatest inventions of the 21st century... We found that by using the unstable platform, we are able to diagnose where [people] are weak and retrain those fibers, and to re-teach the body reflexes necessary for proper balance. The equipment is an invaluable tool for aiding proprioception - the body's ability to know where our extremities are and to keep us balanced. And it allows us to effectively get a person back up to speed faster, ready to go back to full duty.”

Captain Joseph Moore, US Navy, M.D., Medical Director, Miramar Sports Medicine And Reconditioning Team (SMART) Center, Former Commanding Officer of the Medical Treatment Facility aboard the Military Sealift Command (MSC) hospital ship USNS Mercy (T-AH 19).

Korebalance™ Premiere and Korebalance™ were designed to aid in the following:

Post Orthopedic Surgery
Post Acoustic Neuroma Resection
Meniere’s disease
Vertiginous Migraines
Vestibular Neuronitis
Presbystasis
Closed Head Injuries
Multiple Sclerosis
Ataxia
Parkinson’s Disease
Neuronitis
Stroke
Peripheral Neuropathy

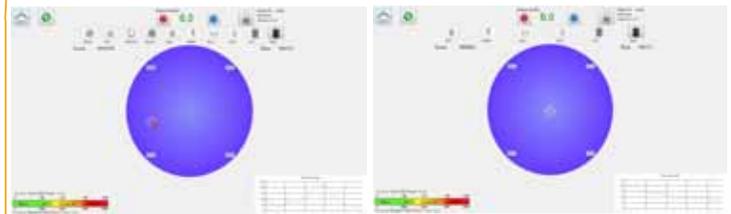

Korebalance™ Premiere and Korebalance™ will assist you in achieving the following benefits:

- Using the body’s balance mechanism to send stimuli through the central nervous system (CNS) to the skeletal muscles
- Real time biofeedback for the peripheral systems
- Re-mapping and retraining neuropathways
- Return of vestibular functionality for mild traumatic brain injuries (mTBI)
- Improving the body’s ability to respond to an unstable environment
- Increasing confidence for seniors to react and recover from impending falls
- Improving agility, reaction time & motor control
- Neurosensory training that is challenging, interactive and fun
- Ability to customize software to meet the individual needs of each patient

- ∞ **FUN, INTERACTIVE 3-D TRAINING PROGRAMS**
- ∞ **UNLIMITED DATA STORAGE AND REPORTS**
- ∞ **LEADING EDGE TOUCHSCREEN INTERFACE WITH A CHOICE OF SIZES**
- ∞ **COORDINATED FUNCTIONAL USE OF ALL THREE PERIPHERAL SYSTEMS** (Vestibular, Vision, and Proprioception)
- ∞ **INFINITE STABILITY SETTINGS** The pneumatic pressure system allows an infinite range of settings. Settings can be adjusted from very stable for the senior population to extremely challenging for professional athletes, and everyone in between.

"Post concussion injuries in the athlete/ client often cause vestibular disorders - some say up to 90%. Vestibular disorders in the assessment and treatment of post concussed patients/ athletes is often missed with the general screens for balance. More sensitive testing is needed. At Werner Institute, Med-Fit Systems' KOREBALANCE equipment is used daily to initially assess the vestibular and balance systems and to allow us to progressively challenge the patient/ athlete. We are believers in this technology and endorse its use."

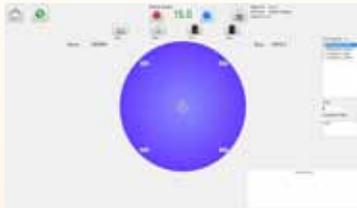

Brian Werner, PT, MPT
President
Werner Institute for Balance and Dizziness

Dynamic Test offers a moving cursor that the user "follows". Four patterns are offered: Circle, Square, Infinity and Random. Each pattern is available in three dimensions: Small, Medium and Large; five speeds; Clockwise and

Static Test requires standing steady & balancing on the platform, keeping the crosshairs of cursor in the center of the test pattern. The Score indicates the deviation of user's center of gravity from the center of the

New: Now with mCTSIB test

The mCTSIB assesses a patient's balance under a variety of conditions to infer the source of instability and provides the clinician with a means to qualify postural control under various sensory conditions.

Detailed Results Screen:

Touch the result that the user would like - see the detailed information and graphic display. It can be easily navigated and printed out in color.

Interactive Games: Increase user interaction and compliance; make training process fun captivating. Numerous game variations.

Tux Racer

Super Tux Kart

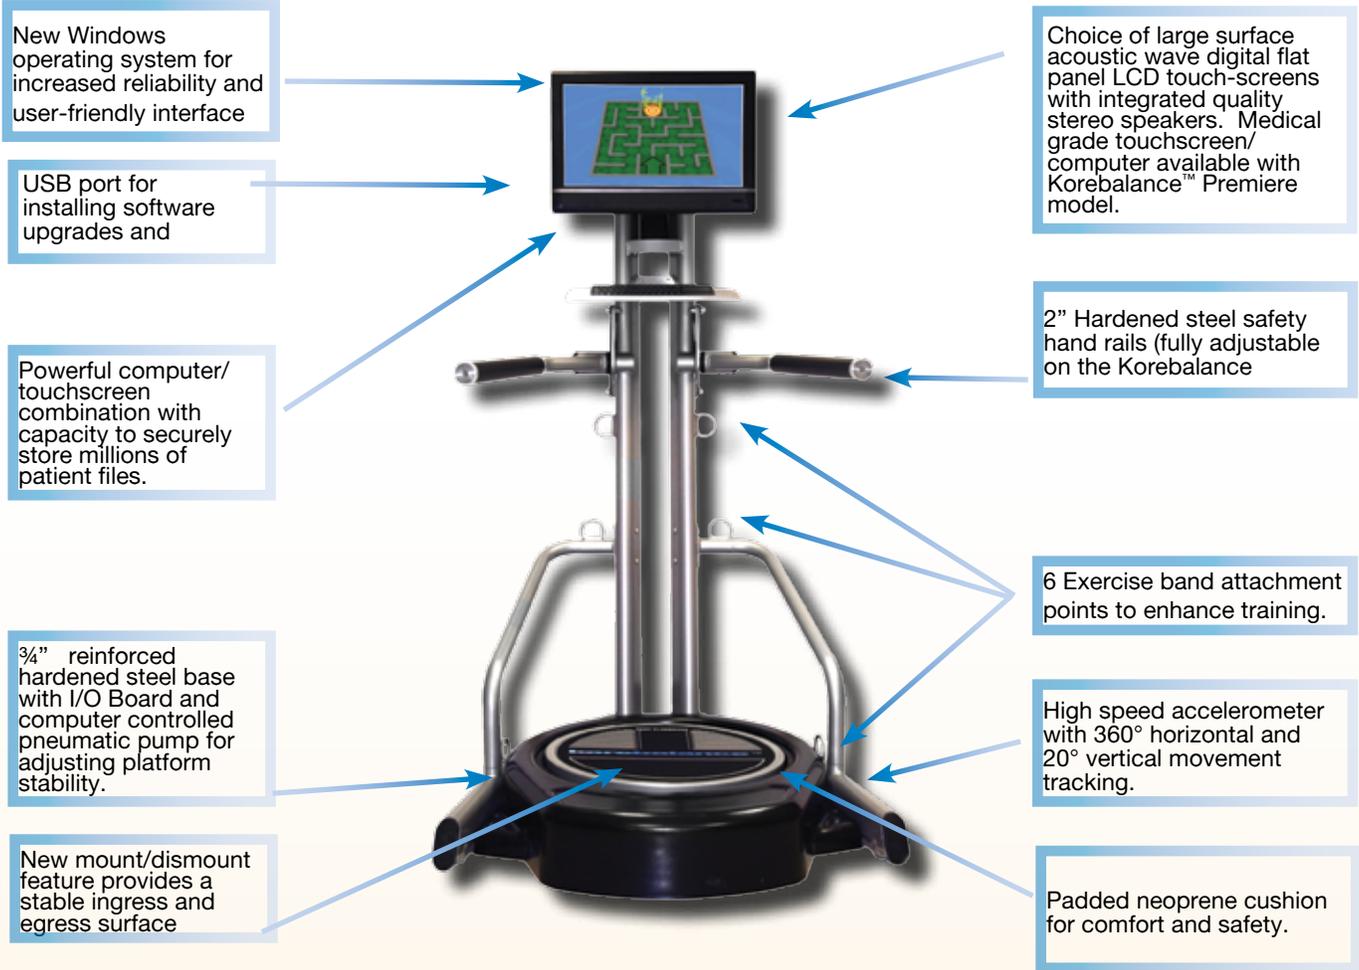

Neverputt

Korebalance™ = Exceptional Hardware

- Large dynamic platform
- Enhanced patented pneumatic system
- Ergonomically designed safety handrails, independently adjustable in the Korebalance™ Premiere model.
- Effortless mobility with integrated wheels
- Anti-slip surface

Clinicians get the following benefits from Korebalance™ Premiere and Korebalance™

- ≈ Evaluate the balance and stability using objective neuro-sensory balance assessment in addition to neuro-cognitive testing tools.
- ≈ Objective documentation: patient's balance assessment and training progress are well documented and can be printed for review.
- ≈ Accurate quantitative balance assessment for the patients receiving neuro-sensory rehabilitation.
- ≈ Personalize rehabilitation protocol according to patient's needs.
- ≈ Patient data storage: maintain records to track progress and issue up to 1 million reports.
- ≈ Get patient's satisfaction due to improving life functions and faster rehabilitation progress.

Patient safety support belt, enabling practitioners to safely test and train patients.

"For many years, I have used Korebalance™ machines in my offices for successful treatment of my patients. I have found it particularly helpful to incorporate these proprioceptive training protocols in treating patients with various balance anomalies. This has improved patients' static and dynamic balance. This training utilizes and improves both ankle and hip strategies effectively. By using guidelines of adjustable pressure under the unstable platform in relation to the patient's height, we have found an improvement in balance with pre vs. post rehabilitation tests for patients with both peripheral and central vestibular deficits, originating from various medical diagnoses. The machines have become an integral part of the balance treatment protocols we've instituted for our patients, and our outcomes certainly are improved by their use. I believe the machines are successful in diminishing fall risk in my patients."

Korebalance™ Premiere With 22" Medical Grade Touchscreen/Computer Combination

22" Touchscreen Computer Specs

- 22" Medical Grade, 16:9 wide screen , 5 wire resistive touch display.
- Resolution: 1920x1028
- Processor: Intel B840 1.9GHz
- Memory: 4GB
- WiFi: Wireless 802.11
- Hard Drive: 250GB HD of file storage
- Video: The Intel® Graphics Media Accelerator 3000HD includes built-in support for full 1080p high-definition video playback
- Audio: Realtek High Definition Audio enables premium Dolby Digital 5.1 surround sound. Two built-in 3.0 watt stereo speakers with two audio jacks for Audio Line Out, and Microphone.
- I/O : 1 x RS232, 4 x USB 2.0 Ports, 1 x RS232/422/485 DVI-I monitor out port Microphone-in & line-out - Enough ports to connect any external devices you may need such as a printer or a scanner.
- Safety & Certifications: EN60601-1 & UL60601-1 Medical Electrical Equipment Certification, FCC Class B, CE, RoHs-WEEE, Energy Star 5.0
- Front bezel is completely sealed with a rating of IP65, and IPX1. Safe to disinfect by spraying directly on the screen.

Machine Specs

- Footprint: 44" x 58" (112 cm x 148 cm)
- Height: 80" (203 cm) - fully extended
- Platform has 360° horizontal and 20° vertical range of movement.
- Individually adjustable safety rails, catering to user's physical ability and height.
- Exercise band attachment points.
- Large, stable stepping platform with low step-up height for ease of access and safe mount and dismount.
- Power: 100-240 VAC; 50/60 Hz; 500 Watt
- Machine weight: 315 lbs. (143 kg)
- Patient weight capacity: 500 lbs. (227 kg)
- Available in white frame
- Warranty: frame, 15 years; electronics, 2 years; wear items, 1 year
- Made in the USA

Korebalance™ Premiere With 19" Touchscreen/Computer Combination

19" Touchscreen Computer Specs

- 19" 4:3, 5 wire resistive touch display.
- Resolution: 1600 x 1200
- Processor: Intel E5500 2.8Ghz Processor
- Memory: 2GB
- WiFi: Wireless 802.11
- Hard Drive: 500GB HD of file storage
- Video: The Intel® integrated H61 Chipset, with Intel® HD Graphics, maximum display resolution of 2560 x 1600
- Audio: Realtek High Definition Audio enables premium Dolby Digital 5.1 surround sound. Two built-in 2.5 watt stereo speakers with three audio jacks for Audio Out, Line-in, and Microphone video cards or decoders.
- I/O: 2 x USB 3.0 Ports, 4 x USB 2.0 Ports, 1 x RS-232 Serial Port, 1 x DVI-I. Enough ports to connect any external devices you may need, such as a printer or a scanner.
- Safety & Certifications: FCC Class B, CE, UL60950, Energy Star 5.0, RoHS, WEEE

Machine Specs

- Footprint: 44" x 58" (112 cm x 148 cm)
- Height: 80" (203 cm) - fully extended
- Platform has 360° horizontal and 20° vertical range of movement.
- Individually adjustable safety rails, catering to user's physical ability and height.
- Exercise band attachment points.
- Large, stable stepping platform with low step-up height for ease of access and safe mount and dismount.
- Power: 100-240 VAC; 50/60 Hz; 500 Watt
- Machine weight: 315 lbs. (143 kg)

kore balance[®] kompact

Features

- Korebalance™ Kompact includes: platform, hand pump, variable air pressure bladder system, analog pressure gauge, tilt sensor, 17" touch screen monitor/computer, adjustable computer stand and color printer.
- Provided with Korebalance windows proprietary software pre-installed on the computer.
- Variable air pressure bladder system and a tilt sensor (solid-state accelerometer) underneath the platform to track movements 360° horizontal and 20° vertical.
- Non-stick neoprene pad on platform for added safety.
- Real time, visual biofeedback.
- Static and dynamic balance assessment and training.
- Neverball game (3D, virtual reality)
- Objective documentation - printed color reports to track progress and document outcomes.
- Proven effective for a wide range of disorders including neurosensory disorders and orthopedic deficiencies. Rehabilitation and training also facilitate in fall reduction.
- Compact and easily transported
- Optional walker, tailored to fit Kompact platform, is available for added stability.

* Korebalance™ Kompact package shown here with optional tailored-to-fit walker.

* Korebalance™ Kompact shown here with standard package.

17" Touchscreen Computer Specs

- 17" touch display.
- Processor: 1 x Atom Dual-core D510 / Intel 1.66 GHz
- Memory: 1GB
- Hard Drive: 160GB HD of file storage
- Video: Intel® GMA 3150
- Weight: 22 lbs. (10 kg)

Adjustable Computer Stand Specs

- 16" x 20" poly table (41 cm x 51 cm)
- Ultimate adjustability for sitting or standing
Table height adjusts between 28" - 46" (71 cm x 117 cm)
- Weight: 12 lbs. (5.4 kg)
- Each leg extends 19" (48 cm) from the center tube when fully opened.
- Warranty: 1 year
- Made in the USA

The logo for Korebalance mobile, featuring the brand name in a blue, sans-serif font. The word 'korebalance' is on the top line and 'mobile' is on the bottom line, both in lowercase. The logo is set against a background of four rounded squares in shades of orange and yellow.

The Korebalance™ Mobile is designed for use by medical centers and clinics, medical and PT offices, assisted living facilities, recreation centers, health and fitness clubs, universities and professional sport teams. It can also be used in conjunction with the Korebalance™ Concussion Management Program.

The Korebalance™ Mobile comes with software pre-installed in a laptop computer. The unit features patent pending variable stability technology. A centrally pivoted balance platform operates with an air pressure bladder system. Bladder pressure is controlled by a handheld pump, providing variable stability. Proprietary balance software provides balance and vestibular assessment, creates training programs, stimulating the brain and nervous system to improve balance, stability, coordination and posture.

The Korebalance™ Mobile is shown here with included laptop stand and carrying bag accessories.

Features

- Korebalance[™] Mobile includes: platform, hand pump, variable air pressure bladder system, analog pressure gauge, tilt sensor and laptop computer.
- Provided with proprietary balance software to be used with laptop computer.
- Variable air pressure bladder system and a tilt sensor (solid-state accelerometer) underneath the platform to track movements 360° horizontal and 20° vertical.
- Non-stick neoprene pad on platform for added safety.
- Real time, visual biofeedback.
- Static and dynamic balance assessment.
- Neverball game (3D, virtual reality)
- Objective documentation - printed color reports to track progress and document outcomes.
- Patient data storage - store over one million reports.

Machine Specs

- Footprint: 23" diameter (58 cm)
- Platform has 360° horizontal and 20° vertical movement capacity
- Machine weight: 22 lbs. (10 kg)
- Patient weight capacity: 500 lbs. (227 kg)
- Supplied with accelerometer, USB cable and Korebalance[™] software CD, laptop computer
- Warranty: 1 year

Korebalance™ Concussion Management Program

The Korebalance™ Concussion Management Program was created to work in conjunction with the Korebalance™ Mobile.

This catalog contains an introduction to the Korebalance™ Concussion Management Program.

Korebalance™ Concussion Management Program

The comprehensive program that combines baseline assessment, proven strengthening regimen, and post injury assessment, including both cerebrum (cognitive) and cerebellum (automatic) function.

Document - Individual's pre-season balance and cognition

Protect - Strengthen neck musculature with Nautilus® Neck Protocol

Assess - Post concussive event

Rehabilitate - Using strength and balance training

Return - Use objective test information to determine return to action

Nautilus ONE®
Four Way Neck Machine

**NAUTILUS® NECK
STRENGTHENING
PROTOCOL**

- Expert-endorsed neck strengthening protocol for reduction of concussion risk, included in Korebalance™ Concussion Management Program.
- Used in conjunction with Korebalance™ Mobile balance assessment and rehabilitation computerized

Renowned author, strength consultant and Professor of Exercise Science, Dr. Wayne Westcott gives an enthusiastic seal of endorsement to the Nautilus® neck strengthening protocol – an important component of the Korebalance Concussion Management Program.

“I could not be more pleased with the Korebalance Concussion Management Program. Every aspect of this innovative neck strengthening and conditioning program is excellent. We have used the recommended training protocol and most of the suggested exercises for many years with highly reinforcing results. The relatively brief time commitment required to perform these advantageous exercises is an investment well-worth making for both the muscle strengthening benefits and the reduced risk of serious neck injuries. My heartfelt congratulations for designing and developing this practical, performance oriented program to help athletes at risk for neck injuries and concussions.”

The Korebalance™ Basic is designed for use by individuals, clinics, medical and physical therapy offices, recreation centers, health and fitness clubs, universities and professional sport teams.

Korebalance™ is a trusted name in orthopedic and neurosensory rehabilitation. The Korebalance™ Basic unit features patent pending variable stability technology. A centrally pivoted balance platform operates with an air pressure bladder system. Bladder pressure is controlled by a hand held pump, providing variable stability. The Korebalance™ Basic provides training programs, improving balance, stability, coordination and posture.

korebalance™ basic

Features

- Korebalance™ Basic includes: base stand, platform, hand pump, variable air pressure bladder system and analog pressure gauge.
- Hand pump control which allows for manual inflation and deflation of the air bladder to adjust the level of difficulty.
- Non-stick neoprene pad on platform for added safety.
- No power supply required
- Proven effective for orthopedic deficiencies.
- Compact and easily transported

Machine Specs

- Model footprint: 23" diameter (58.4 cm)
- Platform has 360° horizontal and 20° range of movement
- Machine weight: 22 lbs. (10 kg)
- Patient weight capacity: 500 lbs. (227 kg)
- Warranty: 1 year
- Made in the USA
