

Home Health Solutions

The products featured provide the visiting clinician with current technology and proven tools to provide quality, measurable outcome therapy sessions in the patient's home environment.

Featured modalities can assess and improve balance, treat circulatory and pain issues, and improve strength and cardiovascular endurance.

Modalities are portable and can fit into virtually any vehicle, with none of the components exceeding 40 pounds.

Products and programs provide the highest level of caregiver and patient safety and efficacy.

MFS- providing quality and compassionate home care products for professionals.

Home Health Solutions

Koresway™ Mobile

The Koresway™ Mobile force platform uses the latest in and interactive technology, offering innovative high-tech balance assessment and training. Backed by over two decades of medical experience, the new Koresway™ will provide you and your patients with the best possible documented neurosensory assessment and training. Under 40 lbs

Koretrainer™

The Koretrainer™ is controlled by a manual pump, providing variable stability. The Koretrainer™ provides balance assessment, improving balance, stability, coordination and posture. 22 lbs

Deluxe folding walker Option

Durable aluminum frame with anodized-aluminum crossbar. Folds to 4 in (w) for easy storage. Handle bars adjust from 31 in (h) - 36 in (h) above floor. 8 lbs

Personal Power Plate

The new Personal Power Plate provides clinicians with a powerful whole body vibration modality in a compact space.

With the ability to address multiple medical needs and pathologies, this technology can be used for orthopedic rehabilitation, fall reduction programs, pain control, circulatory issues, SCI, and many more clinical challenges. 40.4 lbs

Home Health Solutions

Korecognitive™ – Software as a Service

The Korecognitive™ software suite takes the cognition, useful field of view, and Parkinsons testing and training programs from the patented Korebalance® device unto any computer screen.

The cognition module features a testing baseline of 4 sub tests, and a training suite of 7 tailorable cognitive challenges, involving memory, pattern sequencing & target recognition.

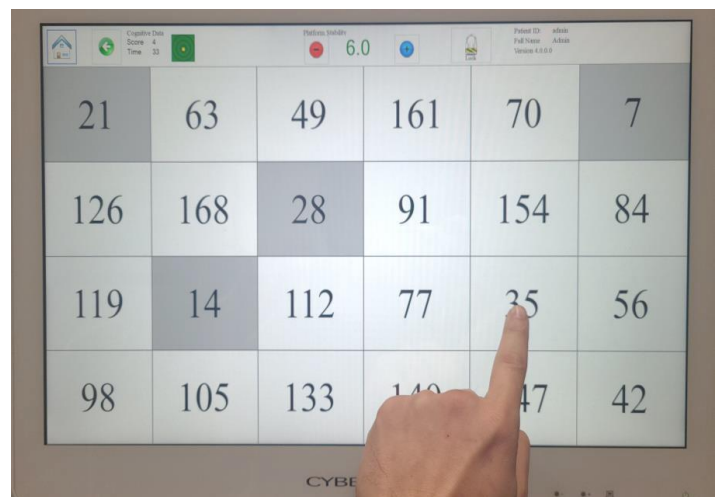

The UFOV module incorporates three subtests to assess visual processing speed, with a tailorable training suite. Captured in milliseconds, scores of 353ms or higher would indicate a higher risk of at-fault automobile accidents.

The Parkinson's program adds the PDQ 8 (Parkinson's Disease Questionnaire) to the cognitive programming.

This ground breaking suite can be administered in clinic, residents rooms, or in the home environment.

Unique SaaS options allow per use, monthly license, and outright purchase of the suite.

Baseline and challenge patients and residents with the proven efficacy of Korebalance®- in the new Korecognitive™ stand alone software.

Home Health Solutions

TRX Professional

Wide variety of body weight exercises can be performed safely with TRX System. Certification and training available. Less than 5 lbs.

Hampton Dumbbells

2.5 and 5 lb dumbbells. 15 lbs

Max Leg Load Weight on unit: 80lbs
Recommended Desk Height From Floor:
25" or higher

Product Weight: 24lbs

Home Health Solutions

Mettler APT

The Active Passive Trainer is lightweight and can be easily moved. It can be used on the floor or on a table top, and has options for exercise speed or resistance. In the “active” mode you control the speed against resistance that you set. In the “passive” mode, the speed of the rotation of the pedals are controlled by the APT and the feet or hands are moved at a selectable constant speed. 22 lbs

Mettler Sys*Stim 228

The Sys*Stim 228 neuromuscular stimulator has four discrete waveforms: Interferential, Premodulated, Medium Frequency (Russian) and Biphasic waveforms. In addition the clinician can set on/off times, pulse width and frequency along with frequency modulation for some of the waveforms. Optional carrying bag. 4.9 lbs

Mettler Sonicator 740

The Sonicator 740 is 1 and 3 MHz therapeutic ultrasound unit that comes standard with a 5cm² dual frequency applicator. It is light-weight and portable and features a universal applicator cable to make changing applicators quick and easy. There is an optional rechargeable lithium ion battery pack that truly allows you to take therapy on the road with you. Large soft-touch controls let you set-up treatments quickly and easily and the backlit display shows all treatment parameters and conditions. Optional carrying bag. 3.75 lbs
