

CyberCycle

Connected Wellness

A Major Breakthrough in **Senior Wellness**

CyberCycling has been shown to delay the onset of Alzheimer's and dementia much better than traditional exercise. It keeps your riders feeling sharp, young, and independent. Plus it's a ton of fun!

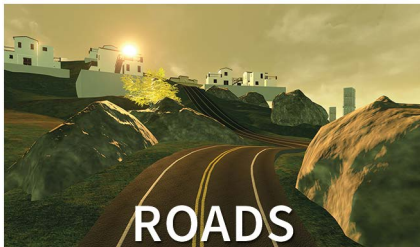

The View is Spectacular The 26.5 inch HD touchscreen is the largest available, connecting your riders to their workouts like never before.

Handlebars That Turn...Heads State-of-the-art handlebars turn left and right driving the workout experience and making every ride unique.

Viva la Resistance The cutting edge magnetic resistance drive simulates hills with incredible accuracy. Nothing is closer to riding outside.

Give a Medal to These Pedals Oversized pedals make it easy to get feet in. Adjustable straps keep feet from slipping out.

Best Seat in the House The Upright CyberCycle comes with an oversized seat for maximum comfort and stability, and can be swapped with any standard bike seat.

ROADS

CyberCycle riders immerse themselves in 300+ miles of stunning interactive roads. From snowy mountains to the seaside, riding the CyberCycle is just like riding outside... minus the helmet and traffic.

GAMES

Never underestimate the power of fun! With the games on your CyberCycle, riders can go off road and discover breathtaking worlds filled with treasures and dragons for a truly unforgettable experience.

CHALLENGES

Your CyberCycle is not just a bike, it's a constantly developing wellness program centered around community. Your CyberCycle riders can challenge others next door or around the world. Everything is automatically tracked online.
