

# CSC900 STAIRCLIMBER

The Spirit Fitness CSC900 StairClimber is a great way to get a challenging yet rewarding workout. A sturdy industrial drive system ensures years of reliable, trouble-free service. The drive method, from steps to brake, is chain connected to steps driving an Electro-magnetic Induction Brake by poly-v belt transmission. The 21.5" step width and 11" step depth provide one of the largest step surface areas of any machine, which increases safety while also easily accommodating training positions such as side crossover steps. The CSC900 has 11 preprogrammed workouts, 20 levels of resistance, and can reach up to 160 steps per minute to help you keep your fitness routines challenging. The multi-position handlebars include built-in contact heart rate and Bluetooth® sensors and resistance controls to help you stay in the zone.
